Subject: Hurricane Harvey - EPA Houston Lab
Date: Thursday, August 31, 2017 8:08:58 AM

Lisa:

I talked with Wes McQuiddy. He indicated that the lab could accommodate about 15 people (10 in conference room and 5 in offices). This space is limited and would probably not work if we are wanting a unified field operation.

I still think that the Tom Bass Park may be the best option of the ones currently identified on the NDOW staging locations for the Houston area. Of course, we are not sure how much impact this location took during the storm. I think Nick may be sending START out to look at this location.

Thanks
